

Designed to protect trellis and anchoring wires from wearing against the galvanised finish of metal end posts. Can be used in combination with a ferrule or a GP1 Gripple wire tensioner.

FEATURES / BENEFITS

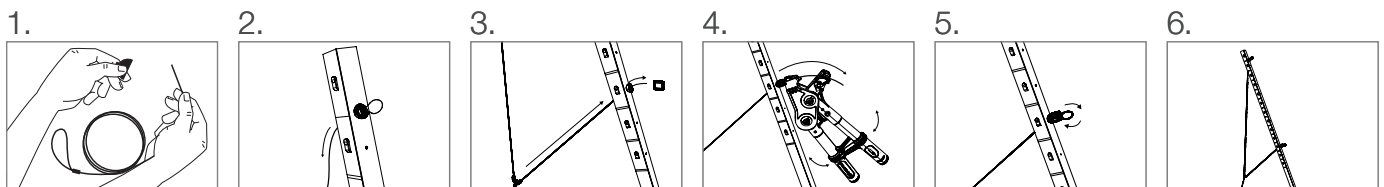

- **Safe** – Protects wires from sharp flash and imperfect post holes
- **Versatile** – Accommodates wire diameters up to 4mm
- **Responsive** – Rotates within the hole to allow 45° movement
- **Universal** – Fits most popular posts with holes with Ø 6,5 – 20,0 mm
- **Useful** – Can be used for end post bracing and for trellising applications
- **Durable** – Die-cast Zinc construction means the part will never rust

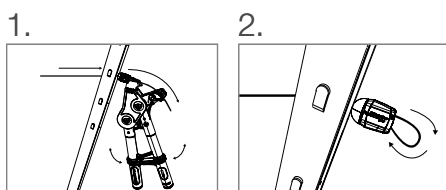

SPECIFICATION

Product	Wire Range	Allowable movement	Maximum Working Load	Outside Diameter
Wire Protector Accessory	up to 4,00 mm	45° maximum (Depending on hole size)	600 kg	25 mm
